# NITISH RAJ

**Full Stack Developer | Python, Django, FastAPI, React, AWS**

Ghaziabad, Uttar Pradesh, India | +91 79034 32878 | nitishr097@gmail.com

linkedin.com/in/nitishraj2000 | github.com/nitishraj98

## PROFESSIONAL SUMMARY

Full Stack Developer with 3.8+ years of experience designing, building and running production web applications, RESTful APIs and serverless, event-driven systems on AWS. Strong in Python (Django, Django REST Framework, FastAPI, Flask) on the backend and React on the frontend, with hands-on experience in PostgreSQL, MySQL, MongoDB and Redis. Has shipped products across fintech (real-time market data and automated trading), travel (flight and hotel booking) and edtech (student counseling), including two platforms that are live today. Owns features end-to-end, from schema and API design to deployment and the user interface.

## KEY HIGHLIGHTS

- Built **serverless market-data APIs** on AWS Lambda and API Gateway for a live fintech platform (app.iyurek.com), covering 5 market regions with a **Redis cache-first** design and automatic fallback between two data providers.
- Automated **real-time trade execution across 2 brokers** (MetaTrader 5 and OANDA) from strategy webhooks, with validated payloads, detailed logging and email status alerts.
- Delivered the backend of a **live edtech platform** (nayeedisha.in) with role-based access for students, counselors and admins.
- Integrated **third-party supplier and data APIs** (Travel Boutique, Twelve Data, FMP) with error handling and fallback strategies so user-facing features keep working when a provider fails.

## TECHNICAL SKILLS

**Languages:** Python, JavaScript, SQL, HTML5, CSS3

**Backend:** Django, Django REST Framework (DRF), FastAPI, Flask, SQLAlchemy, Django ORM, Pydantic, Marshmallow, httpx

**Frontend:** React.js, responsive UI, REST API integration

**Cloud (AWS):** Lambda, API Gateway, EventBridge, SQS, SNS, CloudWatch, S3, EC2, Cognito

**Databases & Caching:** PostgreSQL, MySQL, MongoDB, Redis

**Architecture:** REST API design, Microservices, Serverless, Event-Driven Architecture, Webhooks, Caching strategies

**Security:** JWT Authentication, Role-Based Access Control (RBAC), input validation

**Tools & Practices:** Git, GitHub, Postman, Linux, Pandas, NumPy, code reviews, structured logging, Agile/Scrum

## PROFESSIONAL EXPERIENCE

### Full Stack Developer — Mar 2026 – Present

*Rirabh Consulting Services LLP, Noida, India*

Rejoined the company where I started my career, in a broader full stack role covering backend, frontend and deployment.

- Build and ship full stack features end-to-end: database schema, REST APIs and responsive React interfaces.
- Develop scalable backend services with Python, Django, Django REST Framework and FastAPI, deployed on AWS.
- Design clear API contracts and integrate them with React frontends, secured with JWT authentication.
- Raise code quality across the team through code reviews, structured logging and maintainable, modular architecture.

### Software Engineer — Mar 2025 – Mar 2026

*IOanyT Innovations Pvt. Ltd., Noida, India*

Backend engineer on real-time fintech products: the iYUREK market intelligence platform and an automated trading system.

- Developed Python APIs on **AWS Lambda and API Gateway** powering real-time trading and market-data features, shipping alongside frontend and DevOps teams.
- Designed **event-driven workflows with AWS SQS and EventBridge** to move slow and scheduled work into reliable, decoupled background processing.
- Delivered live market data from Twelve Data and FMP using a **Redis cache-first strategy with API fallback**, keeping responses fast and resilient to provider outages.
- Built watchlist and **price-alert** APIs that email users when their stock thresholds are met.
- Built **FastAPI webhook services** that turn external strategy signals into trades on MetaTrader 5 and OANDA accounts.
- Refactored the codebase for performance and replaced ad-hoc print statements with **structured CloudWatch logging**, making production issues faster to trace.

### Python Developer — Jan 2023 – Feb 2025

*Rirabh Consulting Services LLP, Noida, India*

Backend developer on client web applications, including the Anrari travel booking platform and the Nayeedisha counseling platform.

- Built RESTful APIs with **Django REST Framework and Flask** for multiple client web applications.

- Designed relational schemas and wrote optimized queries with **Django ORM and SQLAlchemy** on PostgreSQL and MySQL, using indexing for faster search.
- Implemented serialization and validation with DRF Serializers and Marshmallow for clean, consistent API responses.
- Secured APIs with **JWT authentication and role-based access control** for multiple user roles.
- Integrated the Travel Boutique supplier API for real-time flight and hotel availability, pricing and booking.
- Owned API testing with Postman collections, wrote API documentation and automated repetitive tasks with Python scripts.

**Software Developer Intern** **Oct 2022 – Dec 2022**

*TwoWaits Technologies Pvt. Ltd., Noida, India*

- Built RESTful APIs with Flask and Django on MySQL and PostgreSQL as part of a development team.
- Applied OOP, DBMS concepts and Git branching workflows on real-world client projects.

## KEY PROJECTS

**iYUREK – Real-time Market Intelligence Platform** **IOanyT Innovations | 2025 – 2026**

*Live: https://app.iyurek.com*

AI-powered platform that collects and simplifies real-time cross-asset market data into fast, visual insights.

- Developed AWS Lambda APIs in Python serving real-time index ribbons (current price, change and percentage change).
- Served data from Redis first, falling back to Twelve Data and FMP APIs on a cache miss or provider failure.
- Organized indices by region: US, Asia, Europe, Cryptocurrency and Commodities.
- Built watchlists and email price alerts; added structured CloudWatch logging for production monitoring.

**Architecture:** Client → API Gateway → AWS Lambda → Redis cache → Twelve Data / FMP → MongoDB

**Tech:** Python, AWS Lambda, API Gateway, Redis, MongoDB, CloudWatch

**FTMO Trading Bot – Automated Trade Execution System** **IOanyT Innovations**

Backend that executes trades across multiple brokers in real time from external strategy signals.

- Built FastAPI webhook endpoints that receive buy/sell triggers from external strategy platforms.
- Validated every incoming payload with Pydantic before any order is placed.
- Integrated MetaTrader 5 and OANDA SDKs to automate execution across broker accounts.
- Sent email notifications with execution status and failure details; tuned for low-latency, reliable execution in demo and live environments.

**Architecture:** Strategy platform → Webhook (FastAPI) → Pydantic validation → MT5 / OANDA → Email alert

**Tech:** Python, FastAPI, MetaTrader 5 SDK, OANDA SDK, Pydantic, httpx

**Anrari – Flight and Hotel Booking Platform** **Rirabh Consulting**

Online platform for flight and hotel booking with real-time availability, pricing and booking history.

- Developed Flask REST APIs for user accounts, search, bookings and availability.
- Designed the relational schema with SQLAlchemy and used Marshmallow for serialization and validation.
- Integrated the Travel Boutique API for live flight and hotel availability, pricing and booking.
- Implemented JWT authentication, booking history and profile management, with fallback strategies for third-party failures.

**Architecture:** Client → Flask REST API → SQLAlchemy + Marshmallow → PostgreSQL, with the Travel Boutique API for live inventory

**Tech:** Python, Flask, SQLAlchemy, Marshmallow, PostgreSQL, JWT

**Nayeedisha – Study Counseling Platform** **Rirabh Consulting**

*Live: https://nayeedisha.in*

Counseling platform that guides students toward courses in India and abroad, connecting students, counselors and admins.

- Built the backend with Django and Django REST Framework, exposing secure, scalable REST APIs.
- Modeled students, counselors and course data in PostgreSQL; optimized search queries with indexing.
- Implemented authentication and role-based access control for 3 user roles (students, counselors, admins).
- Developed endpoints for course search, filtering, inquiry submission and profile management, with API documentation.

**Architecture:** Students / Counselors / Admins → Django + DRF → RBAC + JWT → PostgreSQL

**Tech:** Python, Django, Django REST Framework, PostgreSQL, JWT

## EDUCATION

**B.Tech, Computer Science and Engineering** – *Abdul Kalam Technical University (AKTU) | CGPA: 7.2/10* **2018 – 2022**

## STRENGTHS

- **End-to-end ownership:** takes a feature from requirement and schema design through API, UI, deployment and monitoring.
- **Reliability mindset:** designs for failure with caching, fallbacks, validation and structured logging.
- **Collaboration:** works closely with frontend, DevOps and client teams in Agile sprints and documents APIs for other developers.
